

Butler County General Health District COVID-19 Update (06/09/2020)

Confirmed and Probable COVID-19 Cases Reported to Butler County* Butler County Residents, 2020

| | |
|-------------------------------------|-------------------|
| Total # of Cases*: | 1050* |
| Confirmed Deaths (06/09): | 30 |
| First Case Reported: | 3/11/2020 |
| Last Case Reported (so far): | 6/09/2020 |
| Confirmed Cases: | 1020 |
| Probable Cases: | 30 |
| Age Range: | <1-101 |
| Median Age: | 44 |
| Mean Age: | 44.7 |
| Incidence Rate: | 274.6 per 100,000 |

Figure 1: Cases Reported to Butler County by Symptom Onset Date*

All figures show reported cases of COVID-19 in Butler County as of 1700 EDT 06/09/2020. Due to delays in reporting, the numbers of confirmed and probable cases on Figure 1 are subject to change between reports and confirmed and probable case counts are likely to increase. *This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health. *Data is provisional – only confirmed or probable COVID-19 cases are included in counts. Report reflects time period since the introduction of SARS-CoV-2 into humans, measured in days. Data accessed from the Ohio Disease Reporting System (ODRS) on 06/09/2020 at 1700 EDT.

Figure 2. Cumulative Cases Reported to Butler County by Date Reported*

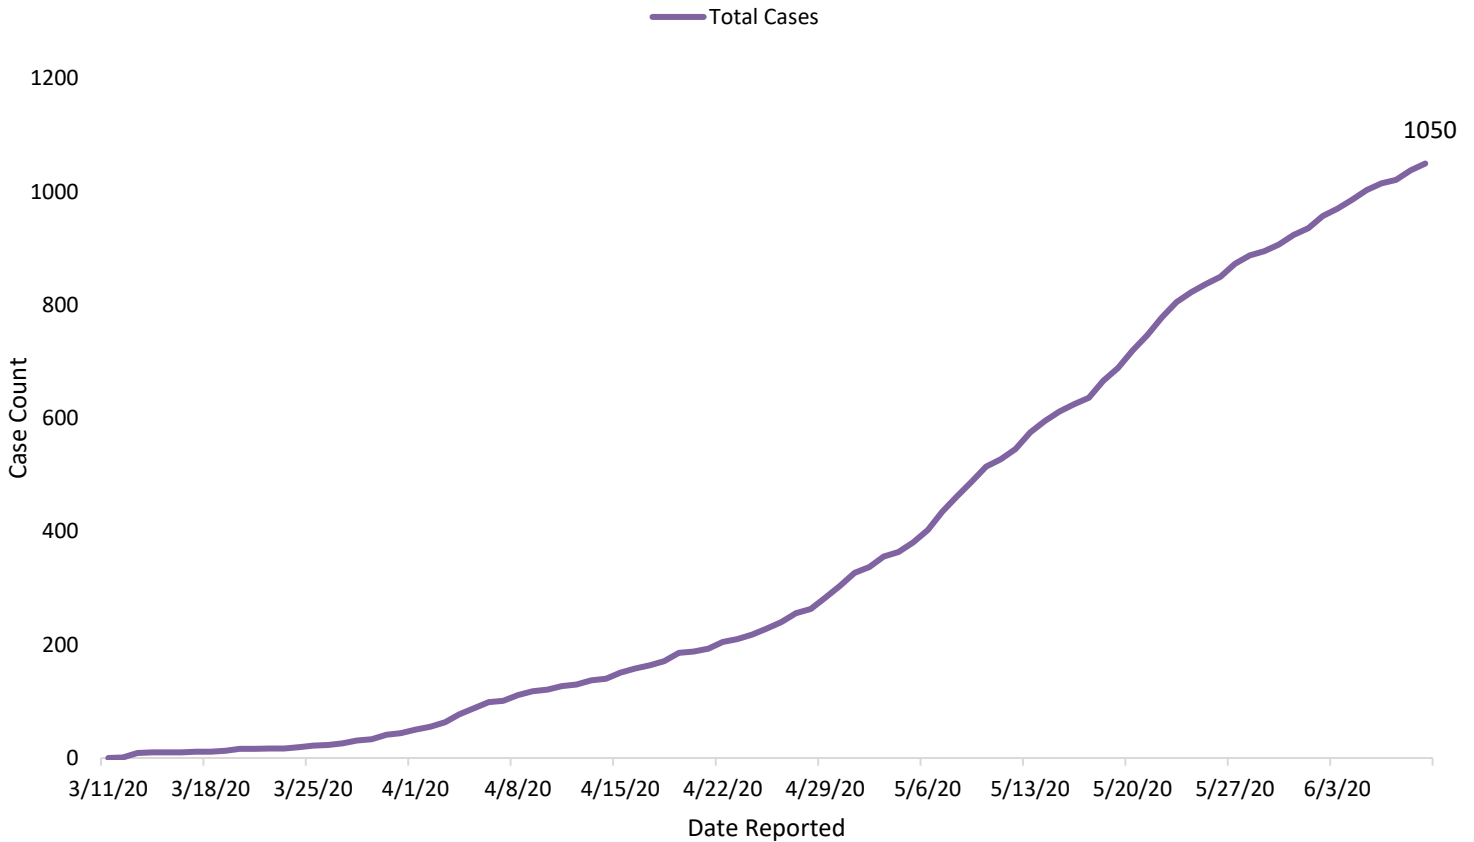

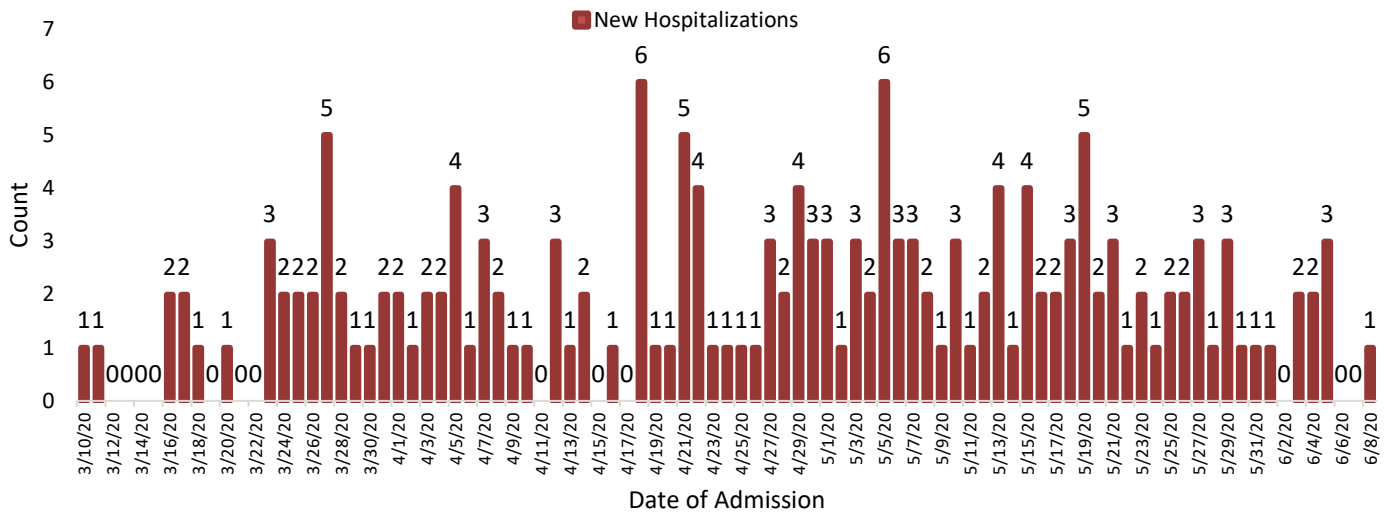

Figure 3. New Hospitalizations by Admission Date

All figures show reported cases of COVID-19 in Butler County as of 1700 EDT 06/09/2020. Due to delays in reporting, the numbers of confirmed and probable cases on Figure 1 are subject to change between reports and confirmed and probable case counts are likely to increase. *This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health. *Data is provisional – only confirmed or probable COVID-19 cases are included in counts. Report reflects time period since the introduction of SARS-CoV-2 into humans, measured in days. Data accessed from the Ohio Disease Reporting System (ODRS) on 06/09/2020 at 1700 EDT.

Demographics of COVID-19 Cases Reported to Butler County

Butler County Residents, 2020

(as of 1700 EDT 06/09/2020)

| Table 1: Total Reported* Cases by ZIP Code | | | |
|--|-----------------|------------------|----------------------|
| ZIP Code | Number of Cases | Rate per 100,000 | % of Confirmed Cases |
| 45014 | 291 | 662.6 | 27.7% |
| 45011 | 220 | 315.7 | 21.0% |
| 45044 | 135 | 255.6 | 12.9% |
| 45069 | 128 | 260.9 | 12.2% |
| 45013 | 74 | 140.6 | 7.0% |
| 45015 | 52 | 432.0 | 5.0% |
| 45042 | 43 | 162.6 | 4.1% |
| 45056 | 28 | 103.6 | 2.7% |
| 45067 | 20 | 143.9 | 1.9% |
| 45050 | 17 | 198.9 | 1.6% |
| 45246 | 14 | - | 1.3% |
| 45241 | 13 | - | 1.2% |
| Butler County (inclusive) | 1035 | | 98.6% |

Zip-codes not calculated have most of their population outside of Butler County. Rate given for comparison by population and will be higher than the actual amount. Eleven cases have no recorded address. Zip-codes with fewer than 5 cases have been removed for privacy concerns.

| Table 2. Exposure Type | | | | | | |
|------------------------|---------------------|----------------|-------------------|-------------------|-------------------|-----------|
| Community | Healthcare Exposure | First Response | Household contact | Travel associated | Congregate living | Workplace |
| 496 | 109 | 6 | 232 | 11 | 78 | 58 |

| Table 3. Clusters in Butler County | | |
|------------------------------------|-------|----------------------|
| Cluster Associated Cases | Cases | % of Clustered Cases |
| Cluster Association | | |
| Household/Family | 232 | 68.6% |
| Congregate living | 73 | 21.6% |
| Workplace | 31 | 9.1% |
| First Response | 2 | 0.6% |

There may seem to be discrepancies between the exposure type and the clusters in Butler County. There are a number of reasons for this. The first is that an exposure is not the same as a cluster. There may be individuals who have had direct contact with their family members, but do not have their own cluster. There also might be individuals who have a different exposure type. For example, a healthcare worker may have a healthcare exposure, and if their family gets sick they would be considered a healthcare exposure but also part of a household/family cluster. Another example would be first responders. Only 2 first responders who live in Butler County are part of a cluster, but there are 4 other first responders who have come down with the illness that did not spread to their coworkers. Some may be from clusters that are related to other jurisdictions.

All figures show reported cases of COVID-19 in Butler County as of 1700 EDT 06/09/2020. Due to delays in reporting, the numbers of confirmed and probable cases on Figure 1 are subject to change between reports and confirmed and probable case counts are likely to increase. *This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health. *Data is provisional – only confirmed or probable COVID-19 cases are included in counts. Report reflects time period since the introduction of SARS-CoV-2 into humans, measured in days. Data accessed from the Ohio Disease Reporting System (ODRS) on 06/09/2020 at 1700 EDT.

Clinical Statistics for Reported Butler County Cases

Butler County Residents, 2020
(as of 1700 EDT 06/09/2020)

| Table 4. Laboratory Statistics | | | | |
|-------------------------------------|---------|----------------------|-----------------------|---------------------|
| | Overall | Private Laboratories | Hospital Laboratories | Public Laboratories |
| Confirmatory Tests with information | 996 | 700 | 270 | 26 |
| Range (in days) | <1-27 | <1-27 | <1-5 | 1-4 |
| Median (in days) | 2 | 2 | 1 | 1 |

| Table 5. Hospitalization Statistics | | | |
|---------------------------------------|-------|----------------------------------|-------------------------|
| | N | Percentage of Hospitalized Cases | Percentage of all cases |
| Total Hospitalized | 178 | 100% | 17.0% |
| Cases with information | 171 | 96% | 16.3% |
| Admitted to Intensive Care Unit (ICU) | 22 | 12.4% | 2.1% |
| Required intubation | 16 | 9.0% | 1.5% |
| Range of Length of Stay (in days) | <1-44 | - | - |
| Median Length of Stay (in days) | 6 | - | - |

All figures show reported cases of COVID-19 in Butler County as of 1700 EDT 06/09/2020. Due to delays in reporting, the numbers of confirmed and probable cases on Figure 1 are subject to change between reports and confirmed and probable case counts are likely to increase. *This should not be assumed to be the total disease burden of COVID-19 in Butler County only those that have been laboratory confirmed OR meet ODH probable case criteria AND reported to Public Health. *Data is provisional – only confirmed or probable COVID-19 cases are included in counts. Report reflects time period since the introduction of SARS-CoV-2 into humans, measured in days. Data accessed from the Ohio Disease Reporting System (ODRS) on 06/09/2020 at 1700 EDT.

| Table 6. Symptoms Reported | | |
|-------------------------------|------------|-------------|
| | N | Percentage |
| Cases with Information | 862 | 100% |
| Cough | 481 | 55.8% |
| Fever | 474 | 55.0% |
| Myalgia | 370 | 42.9% |
| Headache | 307 | 35.6% |
| Shortness of Breath | 277 | 32.1% |
| Chills | 230 | 26.7% |
| Sore Throat | 167 | 19.4% |
| Loss of Taste or Smell | 161 | 18.7% |
| Runny nose | 157 | 18.2% |
| Nausea | 125 | 14.5% |
| Diarrhea | 118 | 13.7% |
| Asymptomatic | 96 | 11.1% |
| Abdominal Pain | 65 | 7.5% |
| Conjunctivitis | 16 | 1.9% |

| Table 7. Death Statistics | | |
|---------------------------|----------|----------|
| | N | % |
| Confirmed Deaths | 30 | 2.9% |
| Age | N | |
| Range | 52-101 | |
| Median | 79 | |
| Mean | 78.1 | |
| Race | N | % |
| NH White | 24 | 80% |
| NH Black | 4 | 13.3% |
| Asian | 2 | 6.7% |
| Risk Status | N | % |
| High Risk** | 30 | 100% |

**Individuals who are high risk are those with underlying health conditions that could exacerbate a SARS-CoV-2 infection including those who are immunocompromised or immunosuppressed or individuals who are older than 65 years of age. High risk status does not imply higher likelihood of disease transmission, but a higher likelihood of a severe illness.
